

**With Continuous Innovation, ComPDF Leads
the Intelligent PDF Era.**

ComPDF is **an end-to-end document processing solution designed for developers**, supporting cross-platform document **creation, viewing, annotation, and editing.**

Professional

Utilizing **AI-driven document analysis** and **semantic understanding technology** to meet deep requirements from editing to automated data extraction.

Comprehensive

Integrating **ComPDF SDK, Cloud, and AI services** to establish an end-to-end, all-in-one document processing solution.

Flexible

Supporting multi-platform software development with **Cloud API and self-hosted deployment** options, helping enterprises stand out in a competitive market.

- **Clients for SDK:** Requires fast integration development; suitable for standardized PDF development kits.
- **Clients for API / Cloud:** Needs to integrate with existing systems; suitable for larger enterprises or system integrators (SI) with development capabilities.
- **Clients for Self-hosted Deployment:** Focuses highly on data security and compliance, with customized environment requirements.
- **Clients for AI Document Processing:** Needs intelligent document parsing, structured data extraction, and automated document processing.

- **AI-Driven Document Systems**

Empowered by **AI language models** to automate document processing needs, significantly optimizing workflows and enhancing data value.

- **Automated Integration Capabilities**

Deeply integrated with **Make, Zapier, and Microsoft Power Automate**, assisting enterprises in easily constructing automated workflows.

- **Diverse and Efficient Processing Solutions**

Comprehensive PDF support (**annotation, creation, editing, eSign**), coupled with hardware and software acceleration solutions to boost performance.

- **Cross-Platform Rendering Engine**

Delivers a smooth, consistent PDF viewing experience compatible with various development frameworks and languages.

- **Plug-and-Play**

Provides developers with standardized SDKs and an agile integration environment, saving development time and labor costs.

- **Large-Scale Data Support**

Offers a high-performance processing architecture to meet enterprise operational needs for handling massive volumes of documents.

- **Deep Industry Focus**

Providing customized solutions tailored for **education, banking/financial services, and construction industries.**

- **Intelligent Database Construction**

Assisting enterprises in building structured databases through **data extraction and conversion**, strengthening decision-making capabilities.

- **Flexible Licensing Models**

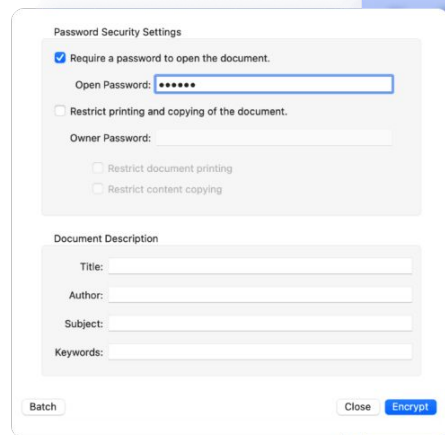

Adapting to the needs of enterprises of different sizes by offering **scalable licensing options and revenue-sharing mechanisms.**

- **Rigorous Security Protection**

Provides **enterprise-level document access control, high-level encryption, redaction, and watermarking** features.

- **Complete Control**

Ensures enterprises can manage large-scale data in a secure and stable environment **through self-hosted deployment and Docker containerization technology.**

A screenshot of a 'Password Security Settings' dialog box. The dialog has a title bar and contains several sections. The first section, 'Password Security Settings', has a checked checkbox 'Require a password to open the document.' followed by an 'Open Password:' field with masked characters. Below this is an unchecked checkbox 'Restrict printing and copying of the document.' followed by an 'Owner Password:' field. Underneath are two unchecked checkboxes: 'Restrict document printing' and 'Restrict content copying'. The second section, 'Document Description', contains four text input fields labeled 'Title:', 'Author:', 'Subject:', and 'Keywords:'. At the bottom of the dialog are three buttons: 'Batch', 'Close', and 'Encrypt'.

ComPDF SDK

- Supports Web, Windows, Android, iOS, Mac, and Cross-platform development.

ComPDF Cloud

- Open API: Quickly connect to cloud services.
- Self-hosted Deployment: Private and secure deployment environment.

ComPDF AI

- Intelligent Document Parsing
- Automated Data Extraction
- Enterprise Knowledge Base Support

Achievements

2024 PDF Association Member

Operating Scale

Over 10 million Documents Processed

*Data as of April 2026
